Index to Technical News Bulletin—Volume 49, 1965

A

Page

Absolute purity, new technique may achieve (Dec.) 212
Accelerometer contributes to pilot safety, new (Apr.) 55
Accelerometer, "thumbtack" (Mar.) 44
Accuracy of spectral radiance calibration increased (Jan.) 14
Accurate length measurements, laser provides (Jan.) 10
Accurate reflectance measurements: an ellipsoidal mirror reflectometer (Oct.) 163
Additives improve roofing asphalts (Sept.) 142
Adsorption on surfaces, polymer (Jan.) 16
Aerosol products, package checking procedures for (Dec.) 199
Air streams, film: mixing non-homogeneous (Jan.) 18
Allen and Ambler appointed to new posts (Oct.) 171
Alpha particle backscattering (Nov.) 180
Aluminum carbide, heat of formation of (Feb.) 26
Aluminum corrosion protection (Feb.) 28
Aluminum fatigue, new data on (Jan.) 6
Aluminum oxide whiskers studied by electron microscopy (Mar.) 49
Aluminum strain behavior studied (July) 110
Analysis of paint pigments, improved method speeds (Dec.) 205
Antenna for WWVB and WWVL, standby (Apr.) 63
Asphalt durability, oxygen and ozone improve (Feb.) 36
Asphalt durability, radiant energy effects on (Jan.) 8
Asphalt, smog attacks roofing (Mar.) 41
Asphalts, additives improve roofing (Sept.) 142
Astin receives ASTM Executive Award (Sept.) 143
Atom reaction studied, ethylene-nitrogen (Oct.) 160
Atomic frequency standard, portable (Jan.) 4
Atomic weights redetermined by mass spectrometry (May) 74
Auto seat belt standards revised (Sept.) 145
Auto seat belt standards set (Feb.) 30
Award recipients, Stratton (Feb.) 39

B

Backscattering, alpha particle (Nov.) 180
Balance speeds weighing of large loads, one-pan (Feb.) 23
Better paper products through microradiography (Jan.) 12
Boulder, IEEE Communications Convention at (May) 81
Broadcasts, changes in NBS radio (Jan.) 5
Broadcasts, changes in NBS radio (Apr.) 66
Broadcasts, changes in NBS radio (Aug.) 137
Broadcasts, changes in NBS radio (Oct.) 176
Built-up roofs, reduce splitting failures of (Aug.) 124
Bureau co-sponsors course in electromagnetic measurements and standards (Mar.) 42

C

Calcium carbide method for moisture analysis improved (Mar.) 45
Calibrating radioactivity standards, improved technique for (Aug.) 121
Calibration center operates at lower humidity, electronic (June) 92
Calibration fees, NBS revises (Apr.) 59
Calibration service extended, electrical (Jan.) 1
Calibration of signal sources, frequency stability (June) 89
Calibration of 12 million pound load cell (Sept.) 154
Calibrations, Canada and U.S. compare inductive voltage divider (June) 95
Calibrations increased, accuracy of spectral radiance (Jan.) 14
Calibrations initiated, peak-pulse power (Dec.) 210
Calorimetry Conference, Nineteenth Annual (Jan.) 15
Canada and U.S. compare inductive voltage divider calibrations (June) 95
Cast-iron standards, film: preparation of white (Aug.) 127
Cavities, thermal radiation from shallow (June) 88
Cement compounds free of CO_2, first (July) 112
Cement study reveals new compound (July) 116
Center established at Oak Ridge, new information (June) 92
Center for computer sciences and technology, Ream heads new (Nov.) 180
Ceramic oxides, thermal emittance of (Mar.) 46
Change recommended for strength test of flat glass (Mar.) 48
Changes in NBS radio broadcasts (Jan.) 5
Changes in NBS radio broadcasts (Apr.) 66
Changes in NBS radio broadcasts (Aug.) 137
Changes in NBS radio broadcasts (Oct.) 176
Chemical notation system, new (Aug.) 128
Chemical releases in the ionosphere (Aug.) 130
Chemistry data center, NSRDS adds radiation (Nov.) 183
Clearinghouse for Federal Scientific and Technical Information:
Central source of government technical information for industry (May) 78
Dedication of (Apr.) 60
The Government-Wide Index to Federal Research and Development Reports (July) 113
Collision processes, ionic (July) 104
Colloidal data contracts let (July) 107
Color charts now available, new NBS (May) 70
Compact code translator for computer languages (Sept.) 141
Compound, cement study reveals new (July) 116
Compounds of copper (II) chloride, new series of coordination (Sept.) 150
Computer languages, compact code translater for (Sept.) 141
Computer parts, Smithsonian receives historic (May) 72
Computer plots potential nuclear damage (June) 85
Computer program for thermocouple tables 217
Condensation observed in tungsten, migration-free (Oct.) 166
Conference, Nineteenth Annual Calorimetry (Jan.) 15
Conference on Weights and Measures, 50th National (Oct.) 164
Constants, electrical engineering units and (May) 75
Constants of iron redetermined, optical (Oct.) 169
Convention at Boulder, IEEE Communications (May) 81
Cooperative studies on the problems of handling space fuels (Nov.) 191
Corrosion protection, guidelines devised for (Nov.) 177
Corrosion protection, aluminum (Feb.) 28
Corrosive gas pressures, transducer allows accurate measurement of (Nov.) 182
Course in electromagnetic measurements and standards, Bureau co-sponsors (Mar.) 42
Course in electromagnetic propagation (Apr.) 66
Criteria for plumbing systems, new (Sept.) 152
CRPL predicts flare hazards (Sept.) 151
CRPL reorganization reflects new responsibilities (Apr.) 56
CRPL transferred to ESSA (Nov.) 178
Cryogenic lines, pressure surge in (Aug.) 129
Cryogenic service, turbine-type flowmeters for (July) 103
Currency scientific program supplements NBS research, foreign (Sept.) 146

D

Data center, NSRDS adds radiation chemistry (Nov.) 183
Data contracts let, colloidal (July) 107
Daylight evaluated, typical (Sept.) 147
Dedication of Clearinghouse for Federal Scientific and Technical Information (Apr.) 60
Dental filling composite, improved esthetic (Apr.) 62
Denture fit, extended study of (July) 114
Detector for complex insertion-ratio-measuring system, precision (Apr.) 58
Device shows patient's pulse, electrical (Oct.) 165
Dipole measurement characterizes OH radical, improved (Oct.) 161
Durability, oxygen and ozone improved asphalt (Feb.) 36
Dye systems for measuring large radiation doses (Dec.) 200

E

Earth ionization energies calculated, rare (Dec.) 202
Eclipse, JILA expedition to cover solar (May) 80
Effect of moisture on fire endurance of plaster (Aug.) 134
Effect of temperature on optical windows (Oct.) 162
Electrical calibration service extended (Jan.) 1
Electrical device shows patient's pulse (Oct.) 165
Electrical engineering units and constants (May) 75
Electromagnetic measurements and standards, Bureau co-sponsors course in (Mar.) 42
Electromagnetic propagation, course in (Apr.) 66
Electron microscopy, aluminum oxide whiskers studied by (Mar.) 49
Electronic calibration center operates at lower humidity (June) 92
Ellipsoidal mirror reflectometer, accurate reflectance measurements: An (Oct.) 163
Emittance of ceramic oxides, thermal (Mar.) 46
Energy effects on asphalt durability, radiant (Jan.) 8
Engineering units and constants, electrical (May) 75
Equation used in polymer studies, Tait (Feb.) 34
ESSA, CRPL transferred to (Nov.) 178
Ethylene-nitrogen atom reaction studied (Oct.) 160
Executive award, Astin receives ASTM (Sept.) 143
Extended study of denture fit (July) 114

F

Fabrics standard, re-evaluation of flammable (Sept.) 154
Fatigue, new data on aluminum (Jan.) 6
Fees, NBS revises calibration (Apr.) 59
Fiftieth National Conference on Weights and Measures (Oct.) 164
Film growth, light retards semiconductor (July) 99
Film: Mixing non-homogeneous air streams (Jan.) 18
Film: Preparation of white cast-iron standards (Aug.) 127
Film sensitivity increased, radiographic (Apr.) 64
Fire endurance of plaster, effect of moisture on (Aug.) 134
First cement compounds free of CO_2 (July) 112
Flare hazards, CRPL predicts (Sept.) 151
Flowmeters for cryogenic service, turbine-type (July) 103
Force-calibration facilities in operation, new NBS (Nov.) 186
Foreign currency scientific program supplements NBS research (Sept.) 146
Formation of aluminum carbide, heat of (Feb.) 26
Free radical observed, new (Dec.) 204
Frequency stability calibration of signal sources (June) 89
Fuels, cooperative studies on the problems of handling space (Nov.) 191

G

Page

Gas pressures, transducer allows accurate measurement of corrosive (Nov.) ---- 182
Giant load cells, NBS calibrates three (May) ---- 73
Glass, change recommended for strength test of flat (Mar.) ---- 48
Glass mechanical properties revealed by heat treatment (June) ---- 90
Guidelines devised for corrosion protection (Nov.) ---- 177

H

Hall devices, new standard for (July) ---- 107
Hazards, CRPL predicts flare (Sept.) ---- 151
Heat of formation of aluminum carbide (Feb.) ---- 26
Heat treatment, glass mechanical properties revealed by (June) ---- 90
Heat of vaporization of high temperature metals (Oct.) ---- 159
High temperature metals, heat of vaporization (Oct.) ---- 159
Historic computer parts, Smithsonian receives (May) ---- 72

I

IEEE communications convention at Boulder (May) ---- 81
Improved dipole measurement characterizes OH radical (Oct.) ---- 161
Improved esthetic dental filling composite (Apr.) ---- 62
Improved method speeds analysis of paint pigments (Dec.) ---- 205
Improved Omnitab gains wide acceptance (Nov.) ---- 179
Improved technique for calibrating radioactivity standards (Aug.) ---- 121
Improved technique requires fewer standards (Aug.) ---- 126
Inductive voltage divider calibrations, Canada and U.S. compare (June) ---- 95
Information center established at Oak Ridge, new (June) ---- 92
Infrasonic station at Tel-Aviv, NBS installs (Sept.) ---- 145
Insertion-ratio-measuring system, precision detector for complex (Apr.) ---- 58
International unit of time, NBS low-frequency station WWVB to broadcast (Feb.) ---- 27
Ionic collision processes (July) ---- 104
Ionization energies calculated, rare earth (Dec.) ---- 202
Ionosphere, chemical releases in the (Aug.) ---- 130
Iron redetermined, optical constants of (Oct.) ---- 169

J

JILA expedition to cover solar eclipse (May) ---- 80
JILA laboratory planned, new (Feb.) ---- 35
Journal of scientific metrology, Metrologia: International (June) ---- 93

L

Laboratory planned, new JILA (Feb.) ---- 35
Laser provides accurate length measurements (Jan.) ---- 10
Latin America, NBS sets up metrology lab in (Dec.) ---- 203
Leather evaluated, new strength test for (July) ---- 108
Light retards semiconductor film growth (July) ---- 99
Load cell, calibration of 12 million pound (Sept.) ---- 154
Load cells, NBS calibrates three giant (May) ---- 73
Loads, one-pan balance speeds weighing of large (Feb.) ---- 23
Low temperatures, new scale established for (July) ---- 102

M

Magnetic resonance in bulk magnetic metals, nuclear (Dec.) ---- 207
Making quarter-wave plates, simplified method for (Oct.) ---- 168
Mass spectrometry, atomic weights redetermined by (May) ---- 74
Measurement seminars for 1965–66, NBS precision (Sept.) ---- Insert
Measurement of corrosive gas pressures, transducer allows accurate (Nov.) ---- 182
Measurement of small spheres evaluated (Dec.) ---- 206
Measurements, laser provides accurate length (Jan.) ---- 10
Measuring large radiation doses, dye systems for (Dec.) ---- 200
Mechanical properties revealed by heat treatment, glass (June) ---- 90
Mechanism proposed for the solvent effect (Nov.) ---- 184
Meters, performance of "slow-flow" (Feb.) ---- 25
Method for moisture analysis improved, calcium carbide (Mar.) ---- 45
Metrologia: International journal of scientific metrology (June) ---- 93
Metrology lab in Latin America, NBS sets up (Dec.) ---- 203
Microradiography, better paper products through (Jan.) ---- 12
Microstructure of nitrided titanium alloy (Aug.) ---- 123
Microwave propagation, overwater (Sept.) ---- 144
Migration-free condensation observed in tungsten (Oct.) ---- 166
Moisture analysis improved, calcium carbide method for (Mar.) ---- 45
Moisture on fire endurance of plaster, effect of (Aug.) ---- 134
Molten salt concentration determinations (Dec.) ---- 208

N

NBS calibrates three giant load cells (May) ---- 73
NBS established pD scale (June) ---- 87
NBS installs infrasonic station at Tel-Aviv (Sept.) ---- 145
NBS issues radioactivity standards (July) ---- 115
NBS low-frequency station WWVB to broadcast international unit of time (Feb.) ---- 27
NBS precision measurement seminars for 1965–66 (Sept.) ---- Insert
NBS revises calibration fees (Apr.) ---- 59
NBS sets up metrology lab in Latin America (Dec.) ---- 203
National Conference on Weights and Measures, 50th (Oct.) ---- 164
New accelerometer contributes to pilot safety (Apr.) ---- 55
New chemical notation system (Aug.) ---- 128
New compound, cement study reveals (July) ---- 116

Page

New criteria for plumbing systems (Sept.) ---- 152
New data on aluminum fatigue (Jan.) ---- 6
New free radical observed (Dec.) ---- 204
New information center established at Oak Ridge (June) ---- 92
New JILA laboratory planned (Feb.) ---- 35
New NBS color charts now available (May) ---- 70
New NBS force-calibration facilities in operation (Nov.) ---- 186
New responsibilities, CRPL reorganization reflects (Apr.) ---- 56
New scale established for low temperatures (July) ---- 102
New series of coordination compounds of copper (II) chloride (Sept.) ---- 150
New specifications for odometers (May) ---- 76
New standard for Hall devices (July) ---- 107
New strength test for leather evaluated (July) ---- 108
New technique may achieve absolute purity (Dec.) ---- 212
Nineteenth annual calorimetry conference (Jan.) ---- 15
Nitrided titanium alloy, microstructure of (Aug.) ---- 123
Notation system, new chemical (Aug.) ---- 128
NSRDS adds radiation chemistry data center (Nov.) ---- 183
Nuclear damage, computer plots potential (June) ---- 85
Nuclear magnetic resonance in bulk magnetic metals (Dec.) ---- 207

O

Odometers, new specifications for (May) ---- 76
OH radical, improved dipole measurement characterizes (Oct.) ---- 161
Omnitab gains wide acceptance, improved (Nov.) ---- 179
One-pan balance speeds weighing of large loads (Feb.) ---- 23
Optical constants of iron redetermined (Oct.) ---- 169
Optical windows, effect of temperature on (Oct.) ---- 162
Overwater microwave propagation (Sept.) ---- 144
Oxide whiskers studied by electron microscopy, aluminum (Mar.) ---- 49
Oxides, thermal emittance of ceramic (Mar.) ---- 46
Oxygen and ozone improve asphalt durability (Feb.) ---- 36

P

Package checking procedures for aerosol products (Dec.) ---- 199
Paint pigments, improved method speeds analysis of (Dec.) ---- 205
Paper products through microradiography, better (Jan.) ---- 12
Particle backscattering, alpha (Nov.) ---- 180
Paths, stability of radio (Sept.) ---- 148
*p*D scale, NBS established (June) ---- 87
Peak-pulse power calibrations initiated (Dec.) ---- 210
Performance of "slow-flow" meters (Feb.) ---- 25
Pilot safety, new accelerometer contributes to (Apr.) ---- 55
Plaster, effect of moisture on fire endurance of (Aug.) ---- 134
Plates, simplified method for making quarter-wave (Oct.) ---- 168
Plumbing systems, new criteria for (Sept.) ---- 152
Polaron behavior studied (Jan.) ---- 7
Polymer adsorption on surfaces (Jan.) ---- 16
Polymer studies, Tait equation used in (Feb.) ---- 34
Portable atomic frequency standard (Jan.) ---- 4
Potential nuclear damage, computer plots (June) ---- 85
Precision detector for complex insertion-ratio-measuring system (Apr.) ---- 58
Precision measurement seminars for 1965–66, NBS (Sept.) ---- Insert
Pressure surge in cryogenic lines (Aug.) ---- 129
Procedures for aerosol products, package checking (Dec.) ---- 199
Propagation, course in electromagnetic (Apr.) ---- 66
Propagation, overwater microwave (Sept.) ---- 144
Protection, Guidelines devised for (Nov.) ---- 177
Publication and Conference Briefs:
- Accuracy in measurements and calibrations, 1965 (Dec.) ---- 216
- Conference on phenomena in the neighborhood of critical points (Jan.) ---- 20
- Critical points conference (July) ---- 118
- Electrical engineering units and constants (Oct.) ---- 172
- Examination of liquefied petroleum gas liquid-measuring devices (Nov.) ---- 192
- Final volumes of humidity and moisture series (Oct.) ---- 172
- Selected tables of atomic spectra, section 1 (Nov.) ---- 192
- Special issue of Radio Science (Nov.) ---- 192
- Statistical analysis of experimental data, the (Nov.) ---- 192
- Systems engineering in ceramics (Nov.) ---- 192
- First volumes of humidity and moisture series (July) ---- 118
- High pulse voltage and microwave high-power seminars (Sept.) ---- 155
- Interdisciplinary aspects of radiative energy transfer symposium (Sept.) ---- 155
- Ionospheric radio propagation (June) ---- 96
- Millimeter wave and far infrared conference (July) ---- 118
- NBS consultant edits radio standards and measurements (Oct.) ---- 172
- NBS Journal of Research features matroids (June) ---- 96
- NBS Technical Highlights reports research developments (Mar.) ---- 52
- New book on liquid hydrogen (Mar.) ---- 53
- 1963 ellipsometry symposium proceedings (Jan.) ---- 19
- 1966 conference on precision electromagnetic measurements (Dec.) ---- 216
- Optical propagation conference (June) ---- 96
- Particle accelerator conference (Jan.) ---- 20
- Particle accelerator conference (June) ---- 97
- Publication on standardization activities revised (Oct.) ---- 172
- Radio Science features non-linear conference papers (Jan.) ---- 19
- Radio Science features "waves-in-plasma" papers (Jan.) ---- 19
- Standard frequency and time services of the National Bureau of Standards (Sept.) ---- 155
- Survey of magnetic thin films published (Mar.) ---- 53
- Thermal radiation proceedings available (Sept.) ---- 155
- Thermophysics specialist conference ---- 216

Pulse, electrical device shows patient's (Oct.) ---- 165
Purity, new technique may achieve absolute (Dec.) ---- 212

Q

Page

Quarter-wave plates, simplified method for making (Oct.) ---- 168

R

Radiant energy effects on asphalt durability (Jan.) ---- 8
Radiation chemistry data center, NSRDS adds (Nov.) ---- 183
Radiation doses, dye systems for measuring large (Dec.) ---- 200
Radiation from shallow cavities, thermal (June) ---- 88
Radical observed, new free (Dec.) ---- 204
Radio broadcasts, changes in NBS (Jan.) ---- 5
Radio broadcasts, changes in NBS (Apr.) ---- 66
Radio broadcasts, changes in NBS (Aug.) ---- 137
Radio broadcasts, changes in NBS (Oct.) ---- 176
Radio paths, stability of (Sept.) ---- 148
Radio spectrum utilization (Aug.) ---- 133
Radioactivity standards, improved technique for calibrating (Aug.) ---- 121
Radioactivity standards, NBS issues (July) ---- 115
Radiographic film sensitivity increased (Apr.) ---- 64
Rare earth ionization energies calculated (Dec.) ---- 202
Ream heads new center for computer sciences and technology (Nov.) ---- 181
Recipients, Stratton award (Feb.) ---- 39
Reduce splitting failures of built-up roofs (Aug.) ---- 124
Re-evaluation of flammable fabrics standard (Sept.) ---- 154
Reflectometer, accurate reflectance measurements: An ellipsoidal mirror (Oct.) ---- 163
Releases in the ionosphere, chemical (Aug.) ---- 130
Reorganization reflects new responsibilities, CRPL (Apr.) ---- 56
Resonance in bulk magnetic metals, nuclear magnetic (Dec.) ---- 207
Roofing asphalt, smog attacks (Mar.) ---- 41
Roofing asphalts, additives improve (Sept.) ---- 142
Roofs, reduce splitting failures of built-up (Aug.) ---- 124

S

Safety, new accelerometer contributes to pilot (Apr.) ---- 55
Salt concentration determinations, molten (Dec.) ---- 208
Scale established for low temperatures, new (July) ---- 102
Scale, NBS establishes pD (June) ---- 87
Sciences and technology, Ream heads new center for computer (Nov.) ---- 181
Scientific program supplements NBS research, foreign currency (Sept.) ---- 146
Seat belt standards revised, auto (Sept.) ---- 145
Seat belt standards set, auto (Feb.) ---- 30
Semiconductor film growth, light retards (July) ---- 99
Seminars for 1965-66, NBS precision measurement (Sept.) ---- Insert
Sensitivity increased, radiographic film (Apr.) ---- 64
Series of coordination compounds of copper (II) chloride, new (Sept.) ---- 150
Signal sources, frequency stability calibration of (June) ---- 89
Simplified method for making quarter-wave plates (Oct.) ---- 168
"Slow-flow" meters, performance of (Feb.) ---- 25
Smithsonian receives historic computer parts (May) ---- 72
Smog attacks roofing asphalt (Mar.) ---- 41
Solar eclipse, JILA expedition to cover (May) ---- 80
Solvent effect, mechanism proposed for the (Nov.) ---- 184
Space fuels, cooperative studies on the problems of handling (Nov.) ---- 191
Specifications for odometers, new (May) ---- 76
Spectral radiance calibrations increased, accuracy of (Jan.) ---- 14
Spectrum utilization, radio (Aug.) ---- 133
Spheres, evaluated, measurement of small (Dec.) ---- 206
Splitting failures of built-up roofs, reduce (Aug.) ---- 124
Stability of radio paths (Sept.) ---- 148
Standard for Hall devices, new (July) ---- 107
Standard Materials:
- Guide for requesting preparation of standards (Nov.) ---- 185
- New glass viscosity standard (Mar.) ---- 43
- New radioactivity standard available (Nov.) ---- 185
- New standards (Apr.) ---- 65
- Preparation of third beryllium-copper standard (Nov.) ---- 185
- Publication series on standard reference materials (Sept.) ---- 151
- Renewal standards (Apr.) ---- 66
- Trace elements certified in 13 spectrometric standards (Feb.) ---- 38
- Two new beryllium copper standards to be prepared (Feb.) ---- 39

Standard, portable atomic frequency (Jan.) ---- 4
Standard, re-evaluation of flammable fabrics (Sept.) ---- 154

Page

Standards and Calibration:
- Attenuation calibration services for coaxial components extended (Oct.) ---- 171
- Calibration of attenuation in coaxial components from 200 MHz to 12 GHz (May) ---- 81
- Calibration of coaxial bolometer units (Aug.) ---- 136
- Calibration instructions available (May) ---- 81
- Changes in NBS radio broadcasts (Nov.) ---- 185
- Changes in NBS radio broadcasts (Dec.) ---- 214
- Color-temperature standards revalued (Mar.) ---- 51
- Electrical calibrations: audio and rf (Mar.) ---- 50
- Impedance measurements of coaxial components extended (July) ---- 117
- Improved attenuation measurements at microwave frequencies (June) ---- 94
- Metrologia (July) ---- 117
- Metrologia, Vol. I, No. 3 (Dec.) ---- 214
- Microwave noise sources: Calibration available in WR62 waveguide (Aug.) ---- 136
- New service: ratio factor of pulse voltage dividers (May) ---- 81
- RF calorimeters now calibrated to 500 MHz (June) ---- 94
- Standards conference papers available (Mar.) ---- 50
- Waveguide bolometer-coupler units (June) ---- 94
- Waveguide calibration changes (June) ---- 94
- Waveguide reflector measurements extended (June) ---- 94
- Waveguide reflectors: Frequency range extended (Aug.) ---- 136
- X-band bolometric and calorimetric standards (June) ---- 94

Standardization study released (May) ---- 82
Standards, film: preparation of white cast-iron (Aug.) ---- 127
Standards, improved technique for calibrating radioactivity (Aug.) ---- 121
Standards, improved technique requires fewer (Aug.) ---- 126
Standards, NBS issues radioactivity (July) ---- 115
Standby antenna for WWVB and WWVL (Apr.) ---- 63
Station at Tel-Aviv, NBS installs infrasonic (Sept.) ---- 145
Strain behavior studied, aluminum (July) ---- 110
Stratton award recipients (Feb.) ---- 39
Streams, film: mixing non-homogeneous air (Jan.) ---- 18
Strength test of flat glass, change recommended for (Mar.) ---- 48
Strength test for leather evaluated, new (July) ---- 108
Sunrise and sunset fading, VLF signals: (Feb.) ---- 32

T

Tait equation used in polymer studies (Feb.) ---- 34
Temperature on optical windows, effect of (Oct.) ---- 162
Thermal emittance of ceramic oxides (Mar.) ---- 46
Thermal radiation from shallow cavities (June) ---- 88
Thermophysics specialist conference ---- 216
"Thumbtack" accelerometer (Mar.) ---- 44
Titanium alloy, microstructure of nitrided (Aug.) ---- 123
Transducer allows accurate measurement of corrosive gas pressures (Nov.) ---- 182
Translator for computer languages, compact code (Sept.) ---- 141
Tungsten, migration-free condensation observed in (Oct.) ---- 166
Turbine-type flowmeters for cryogenic service (July) ---- 103
Twelve million pound load cell, calibration of (Sept.) ---- 154
Typical daylight evaluated (Sept.) ---- 147

U

Units and constants, electrical engineering (May) ---- 75
U.S. compare inductive voltage divider calibrations, Canada and (June) ---- 95

V

Vaporization of high temperature metals, heat of (Oct.) ---- 159
VLF signals: Sunrise and sunset fading (Feb.) ---- 32
Voltage divider calibrations, Canada and U.S. compare inductive (June) ---- 95

W

Weights and Measures, 50th National Conference on (Oct.) ---- 164
Weights redetermined by mass spectrometry, atomic (May) ---- 74
White cast-iron standards, film: Preparation of (Aug.) ---- 127
Windows, effect of temperature on optical (Oct.) ---- 162
WWV to be relocated (Dec.) ---- 215
WWVB to broadcast international unit of time, NBS low-frequency station (Feb.) ---- 27
WWVB and WWVL, standby antenna for (Apr.) ---- 63

U.S. GOVERNMENT PRINTING OFFICE: 1965 O—794-068
